Kotlin • Laravel • Gulp.js • Grunt

LANGUAGE
I can read, write, and speak in:
Portuguese • native
English • fluent
Polish • beginner
Spanish • beginner

INTERESTS

HOBBIES
Things that bring me joy:
Music • Books • Age of Empires II
Share knowledge • Philosophy
Watch movies • Drink Tea • Chess

CONSIDERATION
What makes me proud everyday:
I am a fast learner; and I love to share
any kind of knowledge I have with others.

LAST 3 EXPERIENCES

POSSIBLE | Software engineering and development leadership
From 2018 'til now, I've been architecting and crafting digital solutions for the top companies around the world, and also leading development teams to deliver the best results and evolve them as individual and professionals.

NODO | Software development and engineering
From April 2017 to 2018, I've working on the creation, design, and architecture of software. I've been working with several projects and products, from airplane companies to international e-commerce platforms.

ATLAS TECHNOLOGY | Software Development
In 2017, I worked for Atlas Technology in the development of a people promotion platform known as Fatal Model. We did use technologies such as PHP, Laravel, and MySQL.

PERSONALITY

PROACTIVE | Bringing more than expected
I do not settle for a 'good job', instead, I want to do my best and have an 'excellent job'. I use my experience, dedication, and communication skills to build reliable and extensible solutions.

SELF-MOTIVATED | To be better than myself
I have goals instead of dreams, so I started to work on them, every day. I know what I want and I am always grateful for what I already conquered. Also, I am in pursuit of excellence and that's where I thrive.

FLEXIBLE | I adapt myself depending on situation
I understand the importance of adapting depending on situations and circumstances — that's why I am always opened to hear, argue, and then, change habits or routines if needed.

ENTHUSIAST | Go hard or go home
I never give half of me for something. If I take the decision to do something, I'll sacrifice myself to bring it real because I understand good things come with time, patience, and continuous dedication, along with the learning process.
